

October 9, 2006

I highly recommend Chereskin Architecture as a design firm for hospital projects. Their level of expertise for hospital and medical building type construction projects is unsurpassed in the industry. Kaiser Permanente has a large group of architect and design firms that we use on our many various projects in the San Diego area and Chereskin Architecture most definitely stands out among our selection of architect and design firms.

Some of the previous projects I have worked on with Chereskin Architects have been the Kaiser MRI Project, Vandever Cat Scan Project, Vandever Parking Structure Addition, Vandever Phase 3 Project a new 2-story tower, and many various remodels.

I have personally worked with Chereskin Architecture on many projects over the years and would recommend them on any project.

A handwritten signature in blue ink that reads "Denny Brown".
